Preface

We are excited to present the Proceedings of the 19th International Natural Language Generation Conference (INLG 2026). This year's INLG takes place from October 17 to October 21, 2026 in Utrecht, the Netherlands, and is organized by Utrecht University.

Conference details

The INLG conference is the main international forum for the presentation and discussion of research on Natural Language Generation (NLG). This year, we received 171 conference submissions (including 17 from ARR) and 5 demo paper submissions. After a peer review process, 80 long papers, 13 short papers, and 5 demo papers were accepted to the conference and are included in these proceedings.

The accepted papers showcase the breadth of NLG research, including work on applications, such as data-to-text tasks, machine translation, and summarization; language model evaluation; and many other topics of interest to the NLG community. We thank Rudali Huidrom for serving as Publication Chair and preparing these Proceedings.

Keynotes

We are also excited to have four keynote speakers contributing to this year's program. They will talk about distorted practices within current NLP research culture, language games as tools to evaluate language models' capabilities and for teaching, variation in human judgments and the role of explanations (both by humans and language models), and the complexity of sociotechnical generative systems. The keynote speakers are:

- Ehud Reiter, University of Aberdeen, Lifetime Achievement Keynote
- Malvina Nissim, University of Groningen
- Marie-Catherine de Marneffe, FNRS – UCLouvain
- Seraphina Goldfarb-Tarrant, Cohere

Generation Challenge

In continuation of a long tradition that goes back to 2007, INLG is hosting a Generation Challenge, a track of the main conference focused on developing shared tasks for NLG. The track is chaired by Simon Mille and Saad Mahamood and is described in its own proceedings volume.

Workshops

Four workshops are co-located with the main conference:

- Alternative Architectures and Generative Paradigms for NLG.
- The 2nd Workshop for Young Researchers in Natural Language Generation (YNLG).
- Workshop for Industrial NLP: NLP Research Towards Safety, Reliability, and Real-World Impact
- The 4th Workshop of AI Werewolf and Dialog System 2026 (AIWolfDial2026)

Tutorial

The program also offers a tutorial, titled *Beyond Leaderboards: Evaluation Practices for Open-Ended and Perspectival NLG*. This tutorial provides a practical, hands-on guide to evaluating open-ended NLG by introducing a five-layer design stack that helps researchers move beyond simple leaderboards to responsibly handle subjectivity and annotator disagreement. Presenters are Christina Niklaus (University of St.Gallen), Thomas Huber (University of St.Gallen).

A reflection on the state of INLG

Like all conferences in our field, we have had to deal with a major increase in submissions this year (see Table 1 below). Generally speaking, this is good news, a growing number of people is interested in natural language generation! At the same time, it is also a risk to our community, next to the increased pressure on the reviewing process, (over)burdening our reviewers, growing too quickly might also result in a loss of tradition and identity of our conference.

Year	2018	2019	2020	2021	2022	2023	2024	2025	2026
Submissions	102	147	119	76	51	98	96	122	176

Table 1: Direct submissions to INLG, excluding submissions via ACL's Rolling Review system.

What is INLG about?

For a long time, INLG has been a venue where researchers from academia and industry meet to discuss the development and deployment of NLG systems and the challenges that arise from this. The conference was always known for its strong emphasis on (human) evaluation and for its continued embrace of rule-based systems. In real-world settings, these are surprisingly hard to beat for their robustness. The conference has also focused on cognitive aspects, for instance, on gaining a deeper understanding of the differences and similarities between human and automatic language generation—a classic example is the generation of referring expressions.

The future of INLG

What does the future hold for INLG? We can imagine the possible nature of future editions as being on a spectrum from "focused on classical NLG" to "just another NLP conference." Once we as a community have determined where on that spectrum we would like to be, we can also think about ways to arrive at our preferred destination. For example, future editions of INLG could have:

- A narrower scope accepting papers on fewer specific topics (potentially changing with each edition).
- More detailed reviewer instructions, for instance, papers must include human-based studies.
- Tutorials and hackathons on bringing aspects of rule-based systems into current LLM-based architectures.

But these decisions are really up to the SIGGEN community. We are looking forward to discussing this topic at the conference.

Your INLG 2026 program chairs,
Guanyi Chen, Laura Perez-Beltrachini, and Emiel van Miltenburg

Organizing Committee

Program Chairs

Guanyi Chen, Central China Normal University
Laura Perez-Beltrachini, The University of Edinburgh
Emiel van Miltenburg, Tilburg University

Generation Challenge Chair

Simon Mille, CNRS, University of Bordeaux

Workshop & Tutorial Chair

Jian Yang, Beihang University

Local Organizer Chairs

Albert Gatt, Utrecht University

Local Organizers

Amirhossein Mohammadi, Utrecht University
Anna Wegmann, Utrecht University
Daniil Ignatev, Utrecht University
Dongxu Lu, Utrecht University
Hugh Mee Wong, Utrecht University
Menan Velayuthan, Utrecht University
Nan Li, Utrecht University

Publication Chair

Rudali Huidrom, Indraprastha Institute of Information Technology, Delhi

Sponsor Chair

Robert Weissgraeber, AX Semantics

SIGGEN Board

Chenghua Lin, University of Manchester
David M. Howcroft, University of Aberdeen
Saad Mahamood, Shopware
Simon Mille, CNRS, University of Bordeaux
Patrícia Schmidtová, Charles University

Program Committee

Area Chairs

Lara J. Martin, University of Maryland
Saad Mahamood, Shopware
Kees Van Deemter, Utrecht University
Lea Krause, Vrije Universiteit Amsterdam
Kelvin Han, Singapore Institute of Technology
João Sedoc, New York University
Albert Gatt, Utrecht University
David M. Howcroft, Aberdeen University
Tirthankar Ghosal, Oak Ridge National Laboratory
Simon Mille, University of Bordeaux
Guanyi Chen, Central China Normal University

Reviewers

Rim Abrougui, Harsha Aduri, Shubham Agarwal, Elaf Alhazmi, Manar Ali, Jose Maria Alonso-Moral, Amith Ananthram, Miriam Anschütz, Anya Belz, Savita Bhat, Daniel Braun, Gordon Briggs, Alberto Bugarín-Diz, Hendrik Buschmeier, Michele Cafagna, Silvia Casola, Thiago Castro Ferreira, Kranti Chalamalasetti, Yllias Chali, Watson Wei Khong Chua, Miruna Clinciu, Brian Davis, Xiangjue Dong, Pablo Duboue, Ondřej Dušek, Jane Arleth dela Cruz, Ashraf Elnagar, Nils Feldhus, Esteban Garcés Arias, Dimitra Gkatzia, Javier González Corbelle, Martijn Goudbeek, Tahsina Hashem, Akio Hayakawa, Behnam Hedayatnia, Thomas Huber, Aki Härmä, Evgenia Ilia, Nikolai Ilinykh, Anton Karl Ingason, Takashi Inui, Tatsuya Ishigaki, Joseph James, Yangfeng Ji, Simeon Junker, Asteria Kaeberlein, Mihir Kale, Dmytro Kalpakchi, Yoshinobu Kano, Seiya Kawano, Masayuki Kawarada, Kristina Kobrock, Emiel Krahmer, Maurice Langner, Guy Lapalme, Seolhwa Lee, Leo Leppänen, Ashley Lewis, Tyler Loakman, Khyati Mahajan, Zola Mahlaza, Ruslana Margova, Aleksandre Maskharashvili, David D. McDonald, Kathleen McKeown, María Miró Maestre, Sourabrata Mukherjee, Alwarappan Nakkiran, Shashi Narayan, Huy-Tien Nguyen, Long HB Nguyen, Elizabeth Nielsen, Anna Nikiforovskaya, Rafael Oleques Nunes, Kristýna Onderková, Chinonso Cynthia Osuji, Soma Paul, Paul Piwek, Rhitabrat Pokharel, Ehud Reiter, Matīss Rikters, Julian Rodemann, Yusuke Sakai, Fahime Same, Patrícia Schmidtová, Vera Schmitt, Stephanie Schoch, Ethan Seefried, Anudeex Shetty, Andrew Shin, Manish Shrivastava, Judith Sieker, Catarina Silva, Jasivan Alex Sivakumar, Adarsa Sivaprasad, Yifei Song, Maximilian Spliethöver, Yaji Sripada, Benno Stein, Symon Jory Stevens-Guille, Svetlana Stoyanchev, Kristina Striegnitz, Mengxuan Sun, Barkavi Sundararajan, Hiroya Takamura, Marc Tanti, Aman Singh Thakur, Mariët Theune, Craig Thomson, William Thorne, Stefan Ultes, Sowmya Vajjala, Chris Van der Lee, Qingyun Wang, Zimu Wang, Taro Watanabe, Hugh Mee Wong, Huajian Zhang, Yongxin Zhou, Ingrid Zukerman

Table of Contents

Rate-Resolved Text Evaluation with Masked Diffusion Language Models
Yiqi Liu, Kun Zhao, Chenghua Lin and Nafise Sadat Moosavi 1

Retell, Reward, Repeat: Reinforcement Learning for Narrative Theory-Informed Counterfactual Storytelling
David Y. Liu, Xanthe Muston, Dipankar Srirag, Aditya Joshi, Paul Dawson and Sebastian Sequoiah-Grayson 17

Do We Really Need So Many Tokens? The Performance-Efficiency Trade-off in Tibetan and Sanskrit
Orr Meir Zwebner, Kai Golan Hashiloni, Guy Bilitski, Oded Hellman, Nir Marciano, Erez Yousfan, Shai Fine and Kfir Bar 40

A Multi-Stage Agentic Framework for Effective Counter-Narrative Generation and Refinement
Carmel Kronfeld, Sharva Gogawale, Tetsuro Kobayashi and Irad Ben-Gal 69

CAI-dLLM: Convergence Aware Inference for Diffusion Language Models
Farhana Amin, Sabiha Afroz and Dimitrios S. Nikolopoulos 93

M^2Preserve: A Multidimensional Framework for Evaluating Meaning Preservation in Text Simplification
Abdullah Barayan, Jose Camacho-Collados and Fernando Alva-Manchego 113

In Vino Veritas and Vulnerabilities: Examining LLM Safety via Drunk Language Inducement
Anudeex Shetty, Aditya Joshi and Salil S. Kanhere 139

Beyond Fine-Tuning: In-Context Learning and Chain-of-Thought for Reasoned Distractor Generation
Elaf Alhazmi, Quan Z. Sheng and Wei Emma Zhang 160

Automating Multi-Hop RAG Evaluation via TRIAD: From Context Extraction to Validated Dataset Generation
Lorenz Brehme and Adam Jatowt 191

Can LLM Coding Agents Reason About Time Series?
Filip Rechtorík, Ondřej Dušek and Zdeněk Kasner 210

Strategies for Span Labeling with Large Language Models
Danil Semin, Ondřej Dušek and Zdeněk Kasner 229

A Constraint-Based Formalism for Controlled Text Generation
Lionel Clément 246

Can we use LLMs to generate data-driven patient narratives? A multi-method exploration in the oncology domain
Nele Albers, Linwei He, Anouk Teunissen, Kelly de Ligt, Nadine Bol and Emiel Krahmer . . 257

Chain-of-Thought Depth Modulates Performance by Task and Model: Evidence from Ablation Studies Across Five Model Families
N. Aneesh Dutt 295

ADR-Control: Do LLM Coding Agents Follow Architectural Decisions? An Evaluation of ADR-Grounded Code Generation
Pham The Phong and Phan Duy Hung 301

Not All Linguistic Capabilities Degrade Equally Under Quantization
Arunabh Majumdar 310

Retrieval-Augmented Generation Must Move Beyond Factual Grounding to Represent Diverse Opinions
Aditya Agrawal, Alwarappan Nakkiran, Alex Karlsson, Aman Singh Thakur and Harsha Aduri 321

ViInfoSum: A Novel Dataset for Multimodal Summarization in Vietnamese
Nguyen Khoi Tran, Binh Xuan Le, Nghia Hieu Nguyen, Khiem Vinh Tran and Ngan Luu-Thuy Nguyen 339

From Tables to Quantified Statements: Evaluating LLM Inference Generation through Executable Verification
Mai Mohamed Eida, Gunjan Anand, Ayush Singh and Aleksandre Maskharashvili 351

Metric Cards Make Blind Spots Legible
Minh Anh Nguyen and Nils Feldhus 369

Augmenting Lecture Information via Redundancy-Filtered LLM Slide Descriptions for Blind and Low-Vision Students
Katharina Anderer, Jan Niehues, Karin Müller and Matthias Wölfel 401

PromptDistill: Query-based Selective Token Retention in Intermediate Layers for Efficient Large Language Model Inference
Weisheng Jin, Maojia Song, Tej Deep Pala, Yew Ken Chia, Dorien Herremans and Soujanya Poria 412

FJ-Guard: Persistence-Guided Training-Free Defense for LLM-based Multi-Agent Systems
Yudai Yamazaki, Kentaro Kita, Hiroya Kato, Kento Hasegawa and Seira Hidano 436

CAAF: Confidence and Agreement-Aware Fusion for Multi-LLM Ensembles
Momojit Biswas and Preethu Rose Anish 456

Towards Green Text Generation: Memory-Based Speculative Decoding
Antal van den Bosch 472

Decomposed Entailment for Factuality Checking and Hallucination Detection
Achir Oukelmoun, Nasredine Semmar and Gaël de Chalendar 483

What Did My Adapter Break? A Generation-Level Evaluation of Adaptation and Retention in PEFT-Adapted LLMs
Guy Bilitski, Kfir Bar and Shai Fine 498

Translating Classical Poetry into Modern Prose
Kranti Chalamalasetti and Sowmya Vajjala 515

Self-Verification is All You Need To Pass The Japanese Bar Examination
Andrew Shin 534

Automatic vs. Human Evaluation: Benchmarking 26 Automatic Metrics for Clinical Discharge Summaries
Yu-Wen Chen, Anne A.H. de Hond, Laura Veerhoek, Ruben Peters, Karel G.M. Moons and Artuur M. Leeuwenberg 544

Hierarchical Experience Memory for Multi-Agent Task Planning and Subtask Guidance
Marcus Lee 559

Dynamic Intent-Driven API Pruning for Tool Learning in Small Language Models
Tzu-Hao Wang, Ting-Chun Yang, Sin-Syuan Wu, Ming-Der Yang and Yao-Chung Fan 572

Confident by Default: A Longitudinal Study of Style Drift and Convergence Across Large Language Model Providers
Silas Rech and Tom Bäckström 586

Generating Critical Questions for Arguments: A Large-Scale Analysis of Prompting and Reranking Strategies
Midhun Kanadan and Benno Stein 601

From Sounds to Symbols: A Survey of Phonetically and Phonologically Informed Language Generation
Tyler Loakman, Joseph James and Chenghua Lin 623

Structured Critique Generation Mitigates Toxification in Self-Critique Alignment
Takeru Mitsumori, Hiroya Takamura and Takashi Inui 639

EuroAlpaca: Task-Preserving Localisation of Instruction Data for European Languages
Aleix Sant, Jordi Luque and Carlos Escolano 655

Mid-Utterance Transition Control for Audio Commentary Generation
Ryota Kawamatsu, Tatsuya Ishigaki and Hiroya Takamura 683

Effort and Confidence: Surface Markers in Reasoning Traces Predict Correctness on Insight Puzzles
Richard A. J. Mann and Pranava Madhyastha 696

Reasoning–Answer Entailment Under GRPO and DPO Fine-Tuning
Hadi Mohammadi and Anastasia Giachanou 718

Trust Stack for Mental Health AI: A Survey of Calibration across Human, Interaction, and AI Layers
Xin Sun, Yue Su, Yifan Mo, Qingyu Meng, Yuxuan Li, Min Chen, Mengyuan Zhang, Saku Sugawara, Charlotte Gerritsen, Sander L. Koole, Koen Hindriks and Jiahuan Pei 731

Large Language Models for Data Augmentation in Product Matching
Kateřina Macková and Martin Pilát 753

Persona as a Dynamical System: Attractor-Based Character Control for Neural Text Generation
Yu-Yi Chang, Hao-Che Chiu and Hung-Yu Kao 770

Content Determination Is the Faithfulness Bottleneck: A Computable-Oracle Benchmark for Faithful LLM Explanations of Guardrail Decisions
Arunkumar V 783

Decoding Path Recovery in Number Generation: Shifting to Intermediate Layers and Top-k Ranks
Jasivan Alex Sivakumar and Nafise Sadat Moosavi 799

Cross-Lingual Activation Steering for Multilingual Language Models
Rhitabrat Pokharel, Ameeta Agrawal and Tanay Nagar 815

Beyond Natural Language Plans: Structure-Aware Agentic Planning for Query-Focused Table Summarization
Weijia Zhang, Yifei Yuan, Songgaojun Deng and Evangelos Kanoulas 828

Clarify, Abstain or Answer? Strategising in Conversation with Belief-Augmented Generation
Joris Baan, Wilker Aziz, Barbara Plank and Raquel Fernández 842

A Large-Scale Dataset for Cross-Lingual Multi-Jurisdiction Patent Drafting from Patent Cooperation Treaty Applications
Trung Phuong Le, Hirofumi Nonaka, Koji Marusaki, Katsuhito Sudoh and Seiya Kawano . . . 865

Identifying Check-Worthy Claims by Generating the Implicit Content of Enthymemes
Martial Pastor and Stefan Kok 881

Beyond Agreement: Compositional Validity in Multidimensional LLM Evaluation
Savita Bhat and Vasudeva Varma 895

Perspective-Diverse Utterance Candidate Generation via Input Variation for Race Game Commentary
Mizuki Arai, Tatsuya Ishigaki, Yusuke Miyao, Hiroya Takamura and Ichiro Kobayashi 914

Revealing Current Performance of LLMs in Multi-Agent and Long Logical Context by Automatically Playing the Werewolf Game
Yoshinobu Kano, Yuya Harada, Yuto Sahashi, Daisuke Katagami, Kei Harada, Michimasa Inaba, Takeshi Ito, Hirotaka Osawa, Takashi Otsuki and Fujio Toriumi 934

Pop Quiz! Comparing Educational Assessment Methods for Evaluating Context Utilization vs. Pre-Trained Knowledge in Large Language Models
Anura Deshpande, Suvaditya Mukherjee, Benjamin Nye, Ella Park and Russell Harral 960

TENOR: Tension-Enhanced Narrative Planning and Organization for Report Generation
Aliah Gie Fajardo Zabala and Yi-Shin Chen 972

NexusEngine: Ontology-Constrained, Provenance-Grounded, Multi-Modal Generation for Infrastructure Digital Twins
Kanimozhi Uma and Merijn Vanalderweireldt 992

Probing the Communicative Efficiency of LLMs via Content Selection in Visually Uncommon Reference Games
Simeon Junker, Manar Ali, Kristina Kobrock, Larissa Koch, Marika Sarzotti, Hendrik Buschmeier and Sina Zarrieß 1006

Are LLM Judges Language-Neutral? A Cross-Lingual Meta-Evaluation on Multilingual Summarization
Mohammaderfan Koupaei, Amir Esmaeili, Mahshid Khanali, Florian Mai and Patrícia Schmidtová 1022

One Feedback System Does Not Fit All: Localising Data-to-Text Driver Coaching for the United Kingdom and Nigeria
Iniakpokeikiye Peter Thompson, Jawwad Baig, Ehud Reiter and Dewei Yi 1041

Controllable Lexical Alignment in Dialogue Systems
Sumit Srivastava, Mariët Theune and Alejandro Catala 1053

More Than Rainfall: A Multi-Dimensional Analysis of LLM Flood Cause Multi-Document Summarization for Disaster Risk Management
Jane Arleth dela Cruz, Jarno Van Arkel, Iris Hendrickx and Martha Larson 1074

When More Extractive Summaries Receive Higher Automated Factuality Scores: Evidence from Distilled Scientific Summarization
Joseph Moretto, Peter A. Beling, Tyler Cody and Donald E. Brown 1092

A Tale of Two Error Categories: Exploring Concealed Trade-Offs in the Errors of Automated Judges in Evaluation of Uncertainty Quantifiers
Evgenia Ilia and Wilker Aziz 1105

Language-Agnostic Latent Injection for Multilingual Hybrid Reasoning
Dang Phuong Nam, Nguyen Van Hieu, Nguyen Nam Truong and Phan Duy Hung 1152

Refusal in the Tail: Surfacing Latent Abstention for Context-Refuted Queries
Hansle Lee, Jaeeun Jang and Sangmin Kim 1163

Graph Mapping and LLM Thinking Speed
Ramazan Ali Bahrami and Ramin Yahyapour 1187

Towards Plug-and-Play Attribute Control Modules in Text Generation: An Exploratory Study of LoRA Portability Across Model Families
Michela Lorandi and Anya Belz 1205

Probing, Measuring and Mitigating Activity-Level Gender Associations in Open-Ended Text Generation
Xiangjue Dong, Yibo Wang, Philip S. Yu and James Caverlee 1219

Exploring the feasibility of ontology-based educational question generation with an LLM
Franco Alberto Cardillo, C. Maria Keet and Zola Mahlaza 1236

AdTEx: Evaluating Large Language Models for Diverse Advertisement Template Expansion
Hiroto Otake, Peinan Zhang, Yusuke Sakai, Hiroki Ouchi and Taro Watanabe 1249

InduceGuard: Evaluating Induction Resistance of Large Language Models under Multi-turn Prohibited Keyword Elicitation
Shunichi Yoneda, Yukitake Yoshioka, Yurai Takayanagi, Yumi Fukuda, Ryoma Obara, Yusuke Sakai, Hidetaka Kamigaito, Katsuhiko Hayashi and Shogo Matsuno 1263

ACA-Bot: Evaluating Pedagogical Dialogue Generation in a Spoken LLM-Based Oral Examiner
Julie Bauer, Krist Shingjergji and Aki Härmä 1276

The Truncation Blind Spot: How Decoding Strategies Systematically Exclude Human-Like Token Choices
Esteban Garcés Arias, Nurzhan Sapargali, Christian Heumann and Matthias Aßenmacher . . 1302

A Writer–Editor–Critic Pipeline with Deterministic Fact Verification for Football Match Report Generation
Luís Relvas, Sérgio Nunes and André Restivo 1327

Token Distribution versus Data Volume: Domain Balancing in Multi-Domain Meeting Summarisation
Ashima Sood, Bryan Gardiner and Joan Condell 1348

Frugal Source-Grounded Detection of Graded Omissions in LLM-Generated French Medical Summaries
Hodhaifa Benouaklil, Achir Oukelmoun, Nasredine Semmar, Faiza Belbachir, Jaafer Klila and Hassane Essafi 1383

Comparing Retrieval-Augmented Generation Pipelines for Energy-Aware Code Refactoring
Youssef Oubelmouh, Pierre Chhieng and Amir Salah Eddine Daoudi 1396

Confabulation in a Caption-then-Generate Pipeline: Evaluating Vision–Language Generation of Adolescent Health Information
Abigail Naa Amankwaa Abeo, Steven Smith, Hannah Goss and Michael Scriney 1407

Reference-Based Analysis of Coherence and Diversity in Open-Ended Text Generation
Esteban Garcés Arias 1420
